

Technical Data Sheet

ORGANOMET[®] PWD Sump Conditioner

ORGANOMET PWD is a new treatment designed to safely overcome the problems common to water-based metalworking coolants. **ORGANOMET PWD** will chemically neutralize and prevent the recurrence of odors caused by bacteria. Specially formulated ingredients protect the vital components of the coolant from bacteria and fungi, providing a bio-stable fluid that extends coolant sump life. Regular use of **ORGANOMET PWD** will also maintain a stable pH and help to reduce sticky residues that build up on both the tools and machines.

TYPICAL PROPERTIES

Description Moist blue powder, odorless
pH (0.1% by weight solution) 8.9 ± 0.1

RECOMMENDED APPLICATIONS

For best results, each week add 4 ozs. (1 rounded scoop) of **ORGANOMET PWD** per 25 gallons of water-based coolant. Regular dosing will eliminate and prevent the recurrence of odors and provide a bio-stable fluid.

AVAILABILITY

ORGANOMET PWD is available in pre-measured, 4 oz foil bags as well as in 14 pound pails (measuring scoop included).

ORGANOMET PWD compositions and methods of use are protected by foreign and domestic patents, both issued and pending.
